In Reference:

SCAFCO Supplying Material to Conform to the Buy America and Buy American Acts

To Whom It May Concern:

Within the realm of steel framing, the terms "Buy America and Buy American" connect to two prominent laws, which each champion the use of American-made products in public projects. The goal of these Acts is to promote/sponsor domestic sourcing, ensuring that goods and services for projects are primarily sourced from within the United States.

SCAFCO Steel Stud Company is capable of supplying steel to conform to the provisions of the Buy America and Buy American Acts. SCAFCO guarantees that all steel manufacturing processes take place in the U.S., and all steel is purchased from a steel source located in the U.S.

SCAFCO Steel Stud Manufacturing products meet or exceed the industry standard. SCAFCO only uses prime steel that is certified by the Mill to meet the requirements of minimum steel thickness, yield strength, tensile strength, galvanized coating and ductility/elongation.

SCAFCO Steel Stud Manufacturing products meet all applicable standards as stated in the *American Iron and Steel Institute - North American Specification for the Design of Cold Formed Steel Structural Members (AISI)*.

Sincerely,

Jason Warren
